## Adding Hospice Physicians in Remote Client During a Consult/Admission Visit

There are two places the hospice physicians need to be addressed during a Hospice admission in Remote Client.

Who the Hospice Attending Physician should be discussed with the patient/family during the Hospice Consult/Admission visit. Once that has been decided, they should be added as the Hospice attending using the following steps.

To add the **Hospice Attending** Physician in Remote Client go to the **Address Book**>**Physicians**>**Edit Providers**, then add the **Hospice attending** physician.

After the Hospice Attending physician is added, they will automatically be added to the CTI as the **Attending Physician** when the benefit period is added inside the **SN Hospice Admission/SN Hospice Consult** Contact.

**Note:** If the Certifying Hospice Physician (Hospice Medical Director) is added as the Hospice Attending physician in Address Book, then **No Second Signature Required** should be checked on the CTI. This will gray out the Attending Provider field.
