

EpicEdge Tips & Tricks

New Buttons Added to the Encounters Tab in Hyperspace

February 2023

We have updated the Chart Review Encounters tab in our Home Health and Hospice profile to include the new toolbar buttons that are available elsewhere in the system, including the On Base viewer, the BCH Portal (which allows access to Boston Children's Hospital records), and the WIISE Viewer to view legacy medical records. These new buttons will appear on the standard Encounters tab, not the HH/HSPC Encounters tab.

The screenshot shows the EpicEdge interface for a patient named Nyota Uhura. The 'Chart Review' tab is active, and the 'Encounters' sub-tab is selected. The toolbar at the top of the chart review area includes several buttons, with three new buttons highlighted in a red box: 'Onbase Patient Window', 'BCH Portal', and 'WIISE Viewer'. Below the toolbar, there is a table of recent visits with columns for 'When', 'Type', 'With', and 'Description'. The table lists several encounters, including 'SN NON OASIS START OF CARE' and 'ERRONEOUS ENCOUNTER - SLP OASIS DISCHARGE'.

When	Type	With	Description
01/30/2023	Home Care Visit	Home Health - Homehe...	SN NON OASIS START OF CARE
01/06/2023	Home Care Visit	Home Health - Homehe...	ERRONEOUS ENCOUNTER - SLP OASIS DISCHARGE
01/05/2023	Home Care Visit	Home Health - Homehe...	ERRONEOUS ENCOUNTER - SLP OASIS DISCHARGE WITHOUT VISIT
01/04/2023	Home Care Visit	Home Health - Homehe...	ERRONEOUS ENCOUNTER - SLP OASIS RESUMPTION OF CARE
01/02/2023	Home Care Visit	Home Health - Homehe...	ERRONEOUS ENCOUNTER - SLP OASIS RESUMPTION OF CARE

Note: These buttons do not appear on the Remote Client, as there is no way to add them to the Chart Review toolbar for field users.
