OASIS Submissions Require a Medicare Number for Medicare Replacement Plans

We are unable to submit OASIS due to missing insurance information for Medicare Replace/Advantage plans. When you are adding a Medicare Replacement or Advantage plan to the patients coverage, you will now be prompted to enter a Medicare number. When you are adding the coverage from "Add Coverage" you will see the Medicare ID as a field to populate data in. For plans that are already on the patients insurance, you can click "Coverage Info" to populate the Medicare ID field.

The screenshot displays the EpicEdge interface for a patient named Bernard Home Health. The main window is titled 'Intake for Home Health' and shows various tabs like 'Response History', 'Intake for Home Health', and 'Coverage Wizard'. The 'Coverage Wizard' is active, showing a 'GENERIC - GENERIC MEDICARE REPLACEMENT (Medicare Replacement)' plan. A red box highlights the 'Add Coverage A' button. Another red box highlights the 'Coverage Info' button. A third red box highlights the 'Medicare ID' field in the 'Subscriber Info' section of the wizard. The wizard also shows fields for 'Member Information for Bernard Home Health' and 'Coverage Level Copy'.
