QA Provider Change Contact

QA PROVIDER CHANGE Contact is a new contact type for remote client. This should only be used by the quality team to update a Home Health Attending Provider (M0018) after the plan of care has been sent and/or signed. If the plan of care is not already signed, and the new provider will be the signing provider, the change should be made from the Plan of Care activity directly. However, if the plan of care is signed and the attending needs to be updated in the middle of the cert period, this new workflow will allow M0018 to be updated without adding to the SOC or recert visit or messing with the plan of care.

1. Select New Other Contact from the toolbar and select the new contact type:

2. Update the provider in the M0018 field:

QA Provider Change (12/4/2023) - Demographics/General Info

Add/Remove Forms

Demographics/General Info

Patient Tracking Sheet

(M0010) CMS certification number:	227206		
(M0014) Branch state:	MA		
(M0016) Branch ID number:	22Q7206006		
Primary referring physician:	Warner, Ashley, MD	NPI:	1790714079
(M0018) National Provider Identifier (NPI) for the attending physician who has signed the plan of care:	Stoica, Cristina, MD	NPI:	1346418472
	PCP - Warner, Ashley, MD		
	Referring - Warner, Ashley, MD		
	UK - Unknown or Not Available		
(M0020) Patient ID number:	33473232		
(M0030) Start of care date:	11/14/2023		
(M0032) Resumption of care date:		<input checked="" type="checkbox"/> NA - Not Applicable	
(M0040) Patient name:			
Patient street address:	Maplewood Place		

3. Close and synchronize the contact. That will update the attending provider in Hyperspace as well as on the remote client.
