Remote Client OASIS Functional Questions Change

There will be new answers to a few of the questions on the **OASIS Functional Questions** form, as detailed below. In addition, if a question says "Pick One," clinicians will now be limited to actually selecting a single item.

In the Dressing section of the form:

Dressing

LE Dressing (Pick One): 

- Patient is totally dependent in dressing LE
- Patient requires verbal cues, supervision or assist to safely dress the LE
- Patient is safe and independent with dressing LE
- Patient unable to access items safely - setup required**

UE Dressing (Pick One): 

- Patient is totally dependent in dressing UE
- Patient requires verbal cues, supervision or assist to safely dress the UE
- Patient is safe and independent with dressing UE for UE
- Patient unable to access items safely - setup required**

In the Medications section of the form:

Pts current ABILITY not willingness to take medications (select all that apply): 

- N/A No oral medications
- Pt requires someone to administer oral medication
- Pt requires reminders by another person to take medications
- Pt demonstrates independence with oral medication
- Pt can take meds independently but accepts assistance from family or facility
- Pt requires someone else to set up or create a diary/chart for them**
- Individual dosages are prepared in advance by another person**
