

Update Patient Religion and Veteran Status

Updating a patient's religion and veteran status must be done in Hyperspace. There is currently no way to do this in the remote client. Clinicians needing to update this information can contact their supervisors to update the information in Hyperspace.

1. Open a patient's Home Health or Hospice Intake screen.
2. Click on the **Demographics** link on the Interactive Face Sheet.

3. Update the Veteran status and/or religion can be updated in the outlined fields. Then, select **Accept** to save the changes.

The screenshot shows the 'Demographics' form. The 'Veteran status' field is set to 'No' and the 'Religion' field is empty. Both fields are highlighted with red boxes. The form includes sections for 'Patient Demographics', 'Housing Information', and 'General Information'. The 'Patient Demographics' section includes fields for Name, SSN, Sex, Birth date, and Aliases. The 'Housing Information' section includes a field for Homeless status. The 'General Information' section includes fields for Phonetic name, Marital status, Preferred language, English fluency, Form confidence, Written language, Race, Ethnicity, Hispanic, and Religion. The 'Accept' and 'Cancel' buttons are at the bottom right.
