

High Pointe House Staff Adding New Outpatient Medications to MAR

The following workflow is used by High Pointe House nurses to add medications that were signed by the physician to the MAR so they are able to be administered.

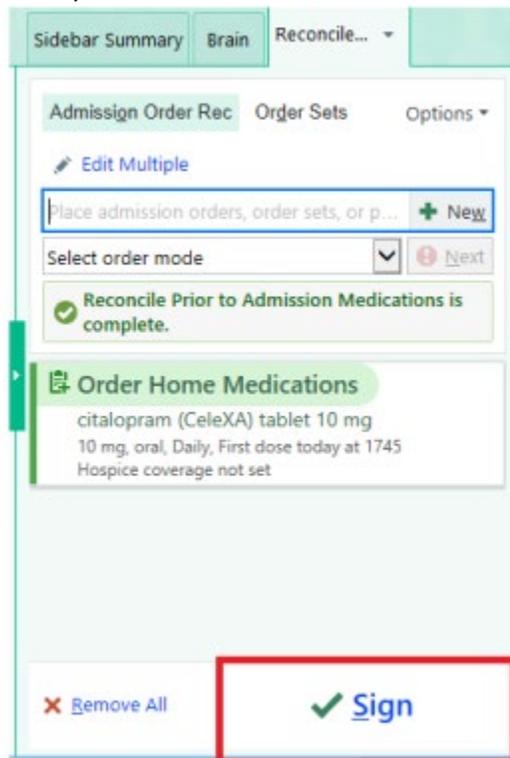

1. Once a physician signs a medication that is sent to LTPS, the next time you open the patient admission you will be presented with a BPA informing you that new medications need to be added to the MAR. Click on the Reconcile Prior to Admission Medications link:

2. Click on the Order button for any medication that needs to be added to the MAR:

3. Once you've clicked Order on all medications, Sign the medications:

4. If presented with an Ordering Information pop up, input the order mode, ordering provider and authorizing provider as appropriate and click Accept. The medication should now be available on the MAR for administering.
