

## Medication History Query

Tufts Medicine has partnered with Surescripts to allow for medication history queries to be completed for patients. Please follow the below workflow to complete a medication history query for Home Health and Hospice patients.

1. Create a Documentation encounter by clicking the Epic Button > choose Patient Care > choose Documentation

2. Search for the patient and click Find Patient button.

Patient Lookup

Patient Search    Recent Patients

Name/MRN:     EPI ID:

SSN:     Sex (Legal):

Birth date:     Zip Code:

Phone #:

Use sounds-like     My patients

- Click on the *Verify Rx Benefits* navigator section. If the patient only has one prescription medication coverage, it will be selected by default. If the patient returns multiple coverages, choose which coverage you want to query by selecting the appropriate *Use As Primary Coverage* button. Click the *Close* button to initiate the query.
