# Outpatient Rehabilitation Services

*In order for patients to go to outpatient for continued rehabilitation services, they need to have been discharged from Home Health VNA. This includes being evaluated for a seating system at a wheelchair clinic. There are exceptions to this however. For example, cases where the patient needs therapy services that cannot otherwise be provided by our staff in the home, i.e. aquatic therapy, orthotic clinic, lymphedema treatment or a Modified Barium Swallow assessment. For this to occur, patients must receive these services at one of the facilities with whom Home Health VNA is contracted and prior approval must be given before the patient begins services. Please contact the Rehab Coordinator or clinical director for prior authorization. Please see your manager if you have any questions. (Contracted outpatient providers are identified with \*.)*
